OBJECTIVE

A sophomore majoring in Data Science with a passion for numbers and innovation. Proud to possess the ability to combine sharp critical thinking and logical creativity to deconstruct complex problems. My ultimate goal is to seek an opportunity to join a professional tech environment, where I can apply and elevate my skills, and directly provide breakthrough data-driven solutions.

EDUCATION

University of Economics - Technology for Industries 2025 - 2029 (expected)
Bachelor of Science in Data Science

SKILLS

Programming Languages	Python, SQL, R, Dart
Data Processing & Analysis	Pandas, NumPy, OpenCV, Statistical Analysis
Machine Learning & AI	Natural Language Processing (NLP), Transformer Architectures
Generative AI & Prompting	Prompt Engineering, AI Agent Integration
Database & Data Flow	MySQL, Firebase
Data Visualization	Power BI, Microsoft Excel
Tools & Environments	Git, GitHub, Docker, Obsidian, FastAPI

PROJECTS

NEO-ONLINE-JUDGE (Educational Platform) January 2026 - March 2026
Python, SQL, Firebase, Prompt Engineering, Full-stack

- Proactively engineered a full-stack educational platform for programming, implementing **SQL** databases and local judge engines to deliver instant automated code assessment.
- Integrated a custom **AI Agent** utilizing advanced **Prompt Engineering** to analyze user submissions and provide real-time, context-aware code feedback.

DATA MINING (Data Mining Suite) October 2025 - Present
Python, Pandas, BeautifulSoup, SerpApi, NASA API, Power BI

- Engineered an automated **ETL pipeline** to extract and validate diverse data streams from NASA POWER API, Google Scholar, and HTML structures.
- Developed **Paper Miner** for Q-rank classification and a **Unified CLI** with batch processing, automating **Power BI** reports for trend analysis.

NEST VOICE BANKING (Inclusive Banking App) May 2026 - Present
Dart, Flutter, Accessibility UI/UX, Firebase

- Engineered a cross-platform **Flutter/Dart** application providing accessible and secure financial services tailored specifically for the hearing-impaired community.
- Applied logical creativity to design an accessibility-first interface, integrating visual transaction alerts and simplified navigation to eliminate communication barriers.

CERTIFICATIONS

IBM Introduction to Data Analytics May 2026
